Nominal Root Ball Width (Adjustable)	42"	Single Axel Truck Length (cab to axel)	84"

MODEL 45D

TRUCK REQUIREMENTS

1. The most popular truck for this application is the F-450 & F-550 Ford 4x4 with Automatic Transmission.
2. Be aware of the location of fuel cells. Some 1-ton (907 kg) chassis trucks have a fuel cell aft of the rear axle. This cell interferes with the mounting of the tree spade and must be replaced.
3. Trucks with automatic transmission require special application wet kits that require an up-charge.
