

Features

The BIG JOHN Puller is easy and simple to use. It hooks to a standard quick connect tractor or skid steer. This machine has small teeth in the front for small trees and brush, and larger teeth in the back for larger trees and maximum clamping pressure.

It comes with standard quick connect hoses and option longer hoses for tractors with rear remotes. Easily clean up shooting lanes at your deer stand, fence rows or anywhere on your farm with the BIG JOHN Puller, it's build to last.
